PROGRAM

TEXAS BRANCH

OF

THE AMERICAN SOCIETY FOR MICROBIOLOGY

FALL MEETING

November 10-11, 1967

The Galvez Hotel Galveston, Texas

FRIDAY AFTERNOON

GENERAL MICROBIOLOGY SESSION

Student Presentation

1:00 p.m.

Greeian Room

. ...

Presiding: Robert C. Hood

- 1. Effects of selected phytohormones on the growth of Escherichia coli. Lynn M. Little** and B. Dwain Vance, North Texas State University, Denton.
- 2. Isolation of a trehalase from Streptomyces hygroscopicus. Ann E. Hey** and A. D. Elbein, Rice University, Houston.
- 3. Regulation of glucose metabolism in Aspergillus niger by fatty acids. Robert T. Ehrlich** and Harold L. Lewis, Texas Technological College,
- 4. Reversal of inhibition of endogenous respiration of Cunninghamella echinulata by lauric acid. James C. Ramsey ** and Harold L. Lewis, Texas Technological College, Lubbock.
- Phospholipid composition of the electron transport fraction of Asotobac-5. ter vinelandii. B. A. Schlech** and Peter Jurtshuk, The University of Texas, Austin.
- Effect of P A D and metal on the particulate L-malate flavoprotein dehy-drogenase of <u>Azotobacter vinelandii</u>. A. J. Bednarz** and Peter Jurtshuk, The University of Texas, Austin.
- Cell free studies of ergot alkaloid biosynthesis. J. A. Anderson and F. L. Cavender**, Texas Technological College, Lubbock.

Refreshment sourcesy of W. H. Cuttin & Co.

- Suppression of clavine lkaloid synthesis by INH. John A. Anderson and Joan Chen**, Texas Technological College, Lubbock. 8.
- The effects of temperature and anaerobic cultivation on the aliphatic 9. hydrocarbon content of Vibrio marinue. Howard J. Schneider**, E. O. Bennett and John Oro, The University of Houston, Houston.
- The production of nutritious protein from a petroleum sulfonate. Harold 10. K. Speidel ** and E. O. Bennett, The University of Houston, Houston.
- Differentiation of <u>Aerobaoter-Klebeiella</u> isolated from sugarcane. W. J. Nunez## and A. R. Colmer, North Texas State University, Denton, and 11. Louisiana State University, Baton Rouge, Louisiana.

*Denotes person presenting paper.

**Person presenting paper is a student.

FRIDAY AFTERNOON

MEDICAL SESSION

1:00 p.m. William I William I

presiding: William J. Mandy

A statistical analysis of microbial contamination in clean rooms and J. Tritz", U.S. Public Health Service, The Service, T A statistical analysis of microutal contamination in clean rooms by lunar spacecraft. Gerald J. Tritz", U.S. Public Health Service Ully by lunar spacecraft. medium for the different of the service of t 1. Cape Kennedy, Flor Cape Kennedy, Flor 2. Use of a nitrogen deficient medium for the differential isolation 2. Use of a nitrogen deficient from feces. Charles Eller and Pitzen of Numberella and Enterobacter from feces. Brooks APR Use of a nitrogen deficient median from feces. Charles Eller and Pitzion of Klebsiella and Enterobacter from Medicine, Brooks APB. Bdwards, USAF School of Aerospace Medicine, Brooks APB States A. Observations on keratinolytic activity of species of Corynebacteria. 4. Observations on keratinolytic activity of Baylor University Collectoria Observations on keratinolytic and C. Wand, Baylor University College of M.E. McBride*, R.G. Freeman and C. Wand, Baylor University College of Medicine, Houston. 5. Effect of serum lipoproteins from infected chick embryos on oxygen Marjorie S. Sharp* and Sanders T. Lyles, Texas of the Effect of serum lipoproteins tion and Sanders T. Lyles, Teras of brain tissue. Marjorie S. Sharp* and Sanders T. Lyles, Teras of the ian University, Fort Worth. Influence of antibacterial drugs on the mouse cecum. D.C. Savaget, be 5. University of Texas, Austin. 7. Vibrio cholerae bacteriocins. T.O. McDonald* and E.W. Gardner, Jr., New Yorth. Christian University, Rort Worth. COFFEE BREAK Refreshments courteey of W. H. Curtin & Co. 8. The effects of pre-existing cholera antibody upon the serological response of cholera vaccination. W.F. Verweys, Y. Watanabe, J.C. Guckian, E.K. Byerly, P. Phillips, S. Rocha and E. Bridgeforth, The University of Tess Medical Branch, Galveston. 9. Antibody response in bats to bacteriophage ØX 174. Betty A. Hatten, Rae Allen and S. Edward Sulkin, The University of Texas Southwestern Medical School, Dallas. 10. Duration of prophylactic effect of statolon against mengovirus in mise. Jerome P. Schmidt* and Frank F. Pindak, USAF School of Aerospace Meditine, Brooks AFB. 11. Effect of statolon treatment on survival time of mice infected with men-govirus. Frank # Pindola District Content of Arosta govirus. Frank P. Pindak* and Jerome P. Schmidt, USAF School of Aerospace Medicine, Brooks APB. 12. Newcastle disease virus characterization following selected adsorption procedures. G.E. Welche aracterization following selected adsorption procedures. G.E. Welch*, C.F. Hall and L.C. Grumbles, Texas A & M University, College Station. 13. The relationship of RE-virus to the avian tumor group. Henry Bose⁴, ¹⁰⁴ University of Texas, Austin University of Texas, Austin. 14. Observation on a parasitic nematode inhabiting the subcutaneous tissues of laboratory mice. Adam provide inhabiting the subcutaneous dissues of laboratory mice. Adam Ewert*, The University of Texas Medical Branch.

1

FRIDAY AFTERNOON

I. M. LEWIS LECTURE

"THE ONTOGENY OF THE IMMUNE RESPONSE"

Dr. Dennie W. Watson

Professor and Head Department of Microbiology The University of Minnesota Medical School Minneapolis, Minnesota

A native of Canada, Dr. Dennis Watson received his early university training at the University of Toronto, but subsequently mi grated to the University of Wisconsin to obtain his doctoral degre In addition to teaching and research positions with the University of Wisconsin and The Rockefeller Institute, Dr. Watson was for a time associated with Connaught Laboratories in Toronto. Unfortunately for Canada, however, he eventually settled at the University of Minnesota Medical School, where for many years he has held an appointment as Professor of Microbiology. He is currently head of the department there.

Dr. Watson is a notable example of the "brain drain" from our friendly neighbors. His contributions to the understanding of infection and resistance are multiple and of fundamental significanc The honors and awards bestowed on him have been numerous, not the least of which is the fact that he is currently the elected Vice-President of the ASM, and thus, as custom has it, will be our next President. FRIDAY EVENING COCKTAIL HOUR The Galves Club 6:30 p.m. Courteey of Scientific Products Co.

> BUFFET DINNER 7:30 p.m. The Terrace Room

Following the dinner, Branch members are velocms tp dontinue their social activities in THE GALVEZ CLUB, at their own risk and expense. Entertainment and music will be provided by JOHNNY GARCIA AND HIS TRIO.

SATURDAY MORNING

MEDICAL SESSION

Student Presentation

8:30 a.m.

Greatan Room

Fresiding: John E. Evans

- . Bacteriological problems associated with inhalation therapy. Benita Mays**, Jay P. Sanford, A.D. Pierce and S. Edward Sulkin, The University of Texas Southwestern Medical School Dallas.
- The effect of a new solidifying agent for bacteriological medium on the inhibitory activity of antibiotics. S.E. Logan**, H.D. Speidel and E.O. Bennett, The University of Houston, Houston.
- Cysticercus-induced rat sarcomas: Transplantability of in vitro cultured tumor cells. Lawrence A. Falk, Jr.**, Paul N. Morgan and Carl E. Duff, The University of Arkansas Medical Center, Little Rock, Arkansas.
- Alteration of lipid components of <u>Staphylococcus</u> <u>aureue-infected</u> chick embryos. R.I. Walker**, M.S. Sharp, S.P. Larsen and S.T. Lyles, Texas Christian University, Fort Worth.
- Studies on a membrane antigen of a staphylococcal L-form. Dorothy C. Dannis** and Judith H. Marston, Baylor University College of Medicine, Houston.
- Induction of an anti-globulin factor in young rabbits. M.E. Woolsey## and W.J. Mandy, The University of Texas, Austin.
- Radiochemical assay for the effect of interferon on rabiesvirus-directed ENA synthesis in normal and actinomycin-treated BHK21 cells. William E. Stewart II^{**} and S. Edward Sulkin, The University of Texas Southwestern Medical School, Dallas.

COFFEE BREAK

- 8. Simultaneous infections with two Sindbis virus mutants. M.G. Broomets and B.P. Sagik, The University of Texas, Austin.
- Mathematical analysis of concomitant virus replication and heat inactivation. D.J.M. Purifoy**, J.A. Purifov and B.P. Segik, the University of Texas, Austin.
- Transfection on Lysostaphin-treated <u>Staphylococcus aureus</u>. H.G. Riggs, Jr.** and E.D. Rosenblum, The University of Texas Southwestern Medical School, Dallas.
- 11. Some effects of lysogeny on <u>Mycobacterium emegmatis</u>. Anderson J. Ward^{##}, Joseph H. Bates and Edwin A. Brosbe, The University of Arkansas School of Medicine and The Little Rock Veterans Administration Hospital, Little Rock, Arkansas.
- A bacteriophage isolated by 4-nitroquinoline (N) oxide treatment of B. subtilis 168M. F. Kadlubar##, H. Hirokawa and I.C. Felkner, Southwestern Center for Advanced Studies, Dallas.
- The effect of p-Fluorophenylalanine on MS-2. Wayne Wray** and Franklin R. Leach, The University of Texas M.D. Anderson Hospital and Tumor Institute, Houston.

SATURDAY FORNING

GENERAL MICROBIOLOGY SESSION

8:80 a.m.

٩

Terrade Room

Presiding: Harold L. Lewis

- 1. Microbial oxidation of hydrocarbons using the Clark oxygen electrode. J.A. Buswell* and Peter Jurtshuk, The University of Texas, Austin.
- Microbial degradation of aromatic hydrocarbons. David T. Gibson*, The University of Texas, Austin.
- A new repressor mutant in the lactose control system of E. coli. Gary C. Chamness* and Clyde D. Willson, USAF School of Aerospace Medicine, Brooks AFB.
- 4. Mutations leading to initiation of gene activity in the tryptophan operon of <u>Salmonella</u>. G. Wuestoff and R. Bauerle*, Southwest Center for Advanced Studies, Dallas.
- 5. The anthranilate synthetase-phosphoribosyl transferase complex in the tryptophan biosynthetic pathway of <u>Salmonella Typhimurium</u>. Derald Smitht and Ronald Bauerle, Southwest Center for Advanced Studies, Dallas.
- Spontaneous recombination in a partially diploid derivative of <u>Secheri-</u> <u>chia coli</u> K-12. Thomas S. Matney^{*}, Mary Ann Butler and Anne Greene, The University of Texas M.D. Anderson Hospital and Tumor Institute, Houston.
- DNA synthesis in a conjugating <u>B. coli</u> K-12 Hfr donor. Joan Suit*, T.S. Matney, Theresa Barbee, Sandra Jetton and Billie White, The University of Texas M.D. Anderson Hospital and Tumor Institute, Houston.

COFFEE BREAK

- Molecular heterogeneity in <u>Bacillus stearothermophilus</u> phage TP-84 DNA. W.N. Reese^{*}, G.F. Saunders, Jane^{*} E. Bergendahl and M. Mandel, The University of Texas M.D. Anderson Hospital and Tumor Institute, Houston.
- 5-Fluorouracil resistance in uracil and thymine requiring strains of Baand G.F. Saunders, The University of Texas M.D. Anderson Hospital and Tumor Institute, Houston.
- Morphology and ultrastructure of <u>Clostridium bifermentans</u> spore appendages. Diane P. Yolton*, Leodocia Pope, M. Glenn Williams and L.J. Rode, The University of Texas, Austin.
- 11. Mechanism of lysis by phosphate of water-stable spheroplasts of <u>Strepto-</u> <u>coscus fascalis</u>. Robert C. Wood* and Anne L. Kopecky, The University of Texas Medical Branch, Galveston.
- Heterotrophic activity and carbon changes in an aquatic microcosm. Robert W. Gorden*, Texas Technological College, Lubbock.
- 13. Relationship of intracellular pH to caproic auid toxicity for <u>Aspergil-</u> <u>Lus miger</u>. Harold L. Lewis*, Texas Technological College, Lubbock,
- 14. Fractionation of indole compounds on Sephadex G-10. John A. Anderson⁴, Texas Technological College, Lubbock.

OFFICERS 1967

President:

EUGENE ROSENBLUM, University of Texas Southwestern Medical School, Da

Vice-President;

IRVING DAVIS, Lt. Col. USAF School of Aerospace Medicine, Brooks AFB.

Secretary-Treasurer:

REUBEN D. WENDE, Baylor University College of Medicine, Houston.

Councilor:

FAUL DONALDSON, Northwestern State College, Natchitoches, Louisiana.

Alternate Councilor:

ROBERT P. WILLIAMS, Baylor University College of Medicine, Houston.

Immediate Past President:

E.O. BENNETT, University of Houston, Houston.

Newsletter Editor:

S.H. BLACK, Baylor University College of Medicine, Mouston.

PROGRAM AND ARRANGEMENTS COMMITTEE

General Chairman: IRVING DAVIS

Local Committee: JOE A. BASS, Chairman, FRANK NEWMAN, JOHN STANTON YOSHIKAZU WATANABE, NAWFAL IZZAT, WILLARD VERWEY.

Registration: REUBEN D. WENDS

SUSTAINING MEMBERS 1467

Aloe Scientific Co., San Antonio. American Optical Co., Houston. B-D Laboratories, Inc., Houston. Bio-Assay Laboratory, Dallas. Borden Co., Houston. Cabell's, Dallas. Canalco, Houston.
